

## Practical2: Creating account, repository on Github and Cloning repository in Github

### a) Creating Account

1. Go to <https://github.com>

Then click on Sign up

2. Fill up your detail :-

Username, Password, and Email:

## create your account

Username \*

Email address \*

Password \*

Make sure it's at least 15 characters OR at least 8 characters including a number and a lowercase letter.  
[Learn more.](#)

### 3. Then verify your email and click create account :

#### Email preferences

☒ Send me occasional product updates, announcements, and offers.

#### Verify your account

Please solve this puzzle so we know you are a real person

Verify

Create account

By creating an account, you agree to the [Terms of Service](#). For more information about GitHub's privacy practices, see the [GitHub Privacy Statement](#). We'll occasionally send you account-related

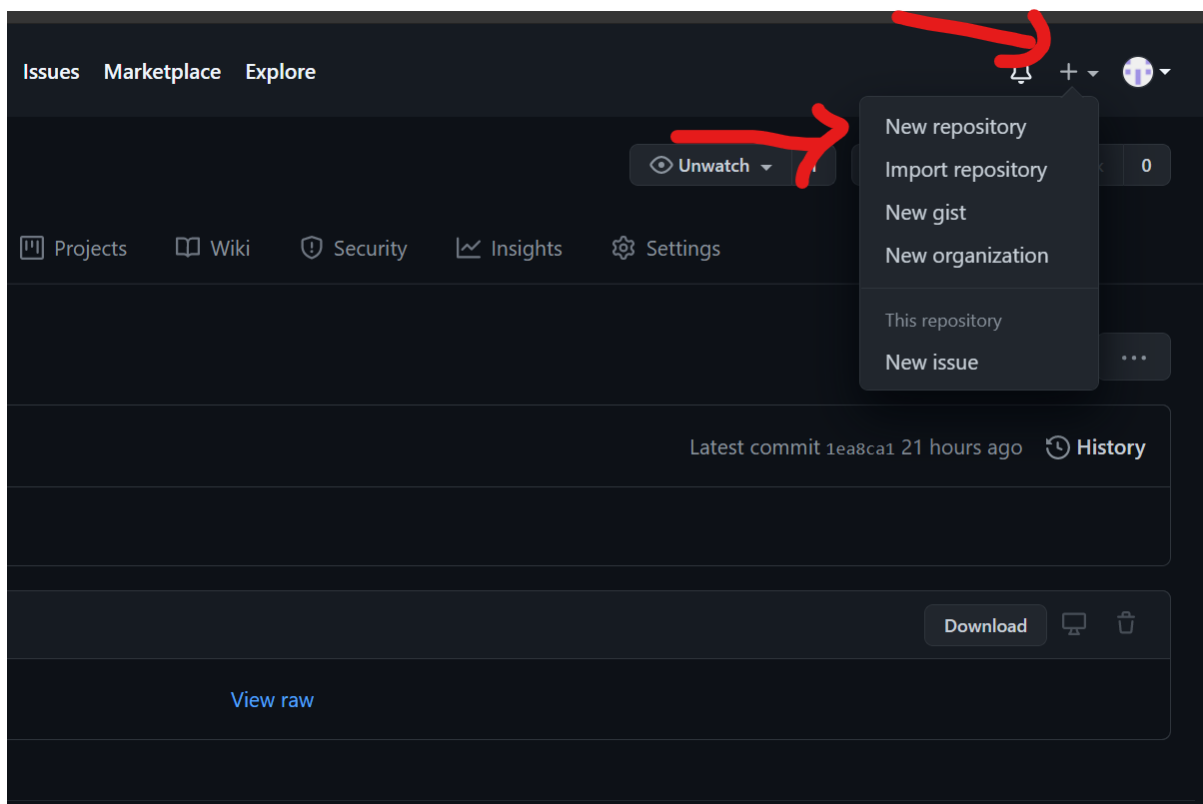

### 4. Select the occupation

What kind of work do you do, mainly?

<b>Software Engineer</b> I write code	<b>Student</b> I go to school
<b>Product Manager</b> I write specs	<b>UX &amp; Design</b> I draw interfaces
<b>Data &amp; Analytics</b> I write queries	<b>Marketing &amp; Sales</b> I look at charts
<b>Teacher</b> I educate people	<b>Other</b> I do my own thing

## b) Creating Repository :

1. Click on + sign and click on New repository

2. Give Name to your repository and do the setting as per required

## Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner \* akhtar2000 / Repository name \*

Great repository names are short and memorable. Need inspiration? How about **fuzzy-lamp**?

Description (optional)

☒ **Public**  
Anyone on the internet can see this repository. You choose who can commit.

☐ **Private**  
You choose who can see and commit to this repository.

### c) Cloning repository:

1. Click on Code in green highlight as shown in screen shot:

2. You can clone it with three steps as HTTPS or SSH or GitHub CLI:
